## **Luminator Technology Group to Exhibit at the 2024 APTA Mobility Conference in Portland, Oregon**

PLANO, Texas – April 22, 2024 – Luminator Technology Group (Luminator) is pleased to announce that they will be exhibiting at the 2024 APTA Mobility Conference in Portland, OR on April 30<sup>th</sup>, at booth 224. Luminator will be showcasing new innovative technology along with introducing their new leadership team. Luminator is continually growing and adjusting to the changes within the market. As the global market continues to change, Luminator is excited to display ePaper and their new software, Luminator Suite.

Luminator has expanded its reach with E Ink by focusing on color displays that can be utilized on board BEB buses providing a low-power solution to TFT displays. E Ink color displays use proven bistable reflective technology that provides superior visibility in direct sunlight, and low power consumption. Management of the ePaper displays is via Luminator's content management software (CMS), providing the ability to monitor display status throughout the network and update content on one or multiple displays as needed.

Luminator will also be hosting a demonstration of their new software, Luminator Suite. The new software enables customers to control their entire fleet through a single, web-based user interface. The software allows easy access to changing destination displays such as configurations of destination messages, route numbers, and public information that can be transferred directly to the vehicle via WIFI or Cellular. The new software also allows the convenience of operation and maintenance on vehicles without returning to the depot.

Other products that you can expect to see at their booth are video mirrors, colored destination signs, mobile video surveillance, and much more. "Luminator continues to innovate and develop useful solutions for our customers and is excited to showcase some of them here at APTA Mobility. Most of all, we're looking forward to connecting with agencies to demonstrate how we are focused on delivering the best passenger experience", says Daria van Engelen, Commercial Vice President of North America at Luminator. For more information about our new products and leadership, please visit our website at [www.luminator.com](http://www.luminator.com).

### **About Luminator Technology Group**

Luminator Technology Group Global (Luminator), is a leading manufacturer of passenger communication systems, video surveillance, and lighting solutions for global mass transportation applications. The company, founded in 1928, leverages its extensive engineering resources to develop solutions that increase intelligence, safety, and efficiency for bus, rail, and aerospace operations worldwide.
